TAMPERE

Seyed Alireza Fatemi Jahromi,

has successfully completed, from Friday 30th of September to Sunday 2nd of October 2022,

XR + 5G mmW Hackathon

An onsite Hackathon taking place in Tampere and powered by Ultrahack. The focus was the development of application concept for utilizing and visualizing cities' diverse data sets while leveraging mixed reality as the user interface, and 5G mmW as communication technology. To support the development of their solution, participants were offered to use Snapdragon 8 powered Motorola Edge Smartphone and the Snapdragon XR1 powered Lenovo A3 ThinkReality smart glasses.

The Jury awarded their team the second position and a 3 000€ cash prize.

A handwritten signature in blue ink, appearing to read 'Juhani Kivikangas'.
